ADMINISTRATION OFFICE

FeedAC Headquarters

1111 N. Dunlap Avenue

Savoy, IL 61874

(217) 356-3182 x28

feedac@assochnq.org

- ❖ The Board of Directors has approved the relocation of the Center of Operations for FeedAC from the University of New Hampshire to Homer, New York. The commercial space consists of 3500 sq. ft. of warehouse space to store and split all feed samples received to FeedAC, as well as over 400 sq. ft. of office space. The move is expected to be completed by the end of June.
- ❖ FeedAC will be conducting a **MEMBERS ONLY** meeting at this years National ADSA/AMPA/ASAS/PSA meeting in San Antonio, TX. The meeting will be on Wednesday, July 11, 2007 from 12:30 to 2:00 PM. Meeting room location has yet to be determined.
- ❖ If you plan on becoming a 2007 member or your company plans on becoming a 2007 sponsor and wish to attend the members meeting mentioned above, please do so by **June 30, 2007**. In addition to ensuring your place at the meeting, you will be able to get involved in discussions regarding important FeedAC issues. If you're not a member and we think you should be, be on the look out for a phone call from either Kenneth Cummings, the board president, or Chuck Schwab, the acting executive director.
- ❖ If your company is already a 2007 FeedAC Sponsor, and you have not returned your companies' membership list, or if you are recognized as a collaborator and need to submit your contact information and contribution statement; please send to FeedAC as soon as possible at feedac@assochnq.org.
- ❖ A welcome to all new collaborators. This list of members continues to grow! If you wish to be a collaborator for 2007, please visit the following weblink and sign up. http://www.feedac.org/collab_form.asp.
- ❖ We now have 3 NIR instruments on location at Sapienza Analytica. To date, 80 FeedAC sample-splits have been sent for initial scanning and further processing. If you are a member of the FeedAC NIR expert group, discussions will begin in the next couple of days as to what different grind-sizes scanning should occur on.
- ❖ **NOTICE:** The FeedAC website continues to be updated with new sponsors, members and collaborators. Also, the discussion boards are "up and going" and intensive/complete analysis has started on a sub-group of fishmeal, soy product and DDGS samples.

Please visit www.feedac.org to view the latest information on all these events plus more.

Thank you.

Feed Analysis Consortium, Inc.

*Dedicated to the advancement of feed analysis and nutritional modeling/
Where feeds, feed analysis, ration formulation and animal production come
together...*
